Guidance on Integrating Climate Change and Biodiversity into Strategic Environmental Assessment. is a response to the above commitments. Most of the projected impacts of climate change are believed to have adverse effects on biodiversity. Since climate change and biodiversity loss â€ like so many other environmental issues we face â€ are closely interrelated, they are covered in the same ...

### **Climate change and biodiversity - Kew**

Climate change is one of many possible stressors on biodiversity. Climate change may manifest itself as a

shift in mean conditions, or as changes in the variance and frequency of extremes of climatic variables (as shown in the inset figure from IPCC, 2001b in Figure 1). There is a growing recognition that planning for changes in variance and an increase in the frequency of extreme events may ...
